

Job Posting for Sun Certified Builders Cooperative (SCBC), Winnipeg, Manitoba. SCBC is hiring Journeyman Framing Carpenters.

Sun Certified Builders Co-op (SCBC) is looking for a Journeyman carpenter. Are you interested in a career opportunity in high-performance new construction and renovations? Would you like to participate in a democratic business structure as a co-op member?

SCBC is an employee-owned worker co-op offering competitive wages (\$29.43-\$36.42/hr depending on experience), training and career development, and the opportunity to participate in the management and growth of the co-op.

We are looking for a full-time skilled journeyman carpenter to fill a leadership role on our team with a start date ASAP.

SCBC promotes justice, equity, diversity, and inclusion (JEDI) and has a diverse hiring policy. We seek to be representative of the demographics in the communities we work in and provide a supportive environment for anyone interested in joining our team. We value a highly collaborative culture and use an Integrated Project Delivery method of project management that brings all stakeholders to the table and fosters mutual help, respect, and development.

After completing a probationary period and successful review processes, employees are eligible to become co-op members and are entitled to a share in dividends.

Our business is high-performance new builds and renovations in both residential and small commercial buildings using Passive House methods and principles. We use advanced framing methods and a Larson truss wall system to prefabricate and install high-performance building components. We use the Passive House Planning Package and DesignPH for energy modelling to design and build some of Manitoba's most energy-efficient and resilient buildings with ultra-low carbon footprints. Our mission is to curb climate change by constructing highly efficient buildings with a net neutral or negative lifetime carbon footprint.

We focus on high-quality craftsmanship and attention to detail. Demand for high-performance buildings is growing, and we need new members to increase our capacity.

Successful applicants must be able to get to job sites within the city. We also work in surrounding communities, so a class 5 driver's license is an asset.

Please send your cover letter and resume to info@suncertifiedcoop.com. The cover letter should outline your carpentry experience and interest in working in a co-op with an environmental sustainability focus. Should you have any questions regarding the opportunity please address them to the email above as well. We look forward to hearing from you.
